

When Sex, Drugs and Rock 'N Roll Ain't Enough, Try Pylon Racing!

Mike Gordon, Utah Valley Aeromodelers

You are invited to come and race with us this year in our exciting new E200 class of affordable electric pylon racers. Using \$10 outrunner motors, \$15 speed controllers and \$11 batteries, the E200 planes offer fun and exciting racing at speeds of about 100 mph! And, we are using a weighted ladder that will pair you with fliers of a similar skill level for closer competition.

While innovation and self-design are encouraged, proven low-cost balsa kits and composite ARF kits and components are available to get you in the air as quickly as possible. Assistance with construction questions or methods, and even help with installing your electronics, is available. We have gathered information and posted it at the racing web site shown below. If you would like to be included in the pylon racing email group, send an email to the Contest Director or the Assistants listed below. Don't wait, start preparing today for the time of your life! Turn Left!

Contest Director: Jon Finch (801) 309-0199 jon.finch@gmail.com

Assistants: Mark and Kimberly Panos (801) 255-3306 mark@motionaero.com or kimberly@motionaero.com
